This listing of claims will replace all prior versions, and listings of claims in the application.

## **Listing of Claims**

Claims 1-3 (canceled)

4. (currently amended) A transgenic plant emprising at least one additional transformed with an exogenous copy of the RAT5 gene of Arabidopsis to increase the transformation efficiency of the transgenic plant.

Claims 5-9 (canceled)

- 10. (currently amended) A host <u>plant</u> cell <u>comprising an exogenous copy of a</u>
  <u>plant histone gene, wherein the expression of the plant histone gene increases transformation</u>
  <u>efficiency of the host plant cell.</u> transformed by at least one copy of a gene involved in T-cell integration.
- 11. (currently amended) The host <u>plant</u> cell of claim 10, wherein the <u>plant histone</u> gene <u>encodes a histone H2A protein to increase the transformation efficiency of the host plant cell.</u> is capable of overexpressing histone to enhance plant transformation.
- 12. (currently amended) The host <u>plant</u> cell of claim 11, wherein the <u>plant histone</u> gene is the *RAT5* gene of *Arabidopsis*.
- 13. (new) A transgenic plant comprising an exogenous copy of a plant histone gene, wherein the expression of the plant histone gene increases transformation efficiency of the transgenic plant.
- 14. (new) The transgenic plant of claim 13, wherein the plant histone gene encodes a histone H2A protein to increase the transformation efficiency of the transgenic plant.
